Intelligence Compliance for Government

Fast-Track Digital Transformation with Automated Continuous Compliance

Technology advances help Federal agencies improve operations and ensure mission success, but adding, updating and deploying IT systems can be cumbersome and come with security issues and setbacks. Additionally, agencies can spend significant resources just maintaining security and compliance across complex networks. This often makes undertaking additional agency modernization initiatives a challenging task.

Infrastructure automation can help agencies streamline their security compliance and rapidly scale their digital transformation initiatives with confidence. Puppet provides the intelligent continuous compliance, monitoring, and security that today's government agencies need.

Deliver Continuous Compliance and Security

Puppet Enterprise makes it easy for agencies to automate compliance, continuously monitor, and enforce state. Manage it and write it once; Puppet Enterprise makes sure it stays true. Puppet helps agencies to:

- Automate compliance with DISA STIGs and NIST 800-53
- Continuously monitor and enforce compliance state every 30 minutes
- Run in a Federal Information Processing Standards (FIPS) compliant environment, managing nodes on multiple FIPS operating systems
- Intelligently manage rules conflict without overwriting
- Dynamically discover, filter, prioritize and remediate vulnerabilities at scale

A comprehensive platform of features to streamline and scale agency compliance and modernization activities:

- Fast-track and automate compliance with STIGs and NIST 800-53
- Run in a FIPS compliant environment and manage nodes on many FIPS operating systems
- Automatically deploy and configure systems based on agency defined policies and controls
- Continuously monitor for system changes and reinforce desired state
- Centralize compliance reporting and provide dashboard visibility across the entire agency infrastructure
- Access Puppet Forge's global ecosystem of over 6,600 modules to automate almost any system

Ensure Digital Transformation

Transformation can affect a number of different downstream systems. A single configuration error could bring down one or more applications. Puppet enables agencies to ensure mission-critical systems are always available, even when newly deployed or updated, reducing risk by:

- Automatically checking and correcting for drift
- Reviewing impacts of proposed configuration changes prior to deployment
- Standardizing and hardening operating system and application configurations

Fast-Track Modernization

Puppet's automation fabric accelerates agency modernization. Its enterprise-wide security features and controls reduce manual management costs and eliminate vendor lock-in. Specific benefits of Puppet Enterprise include:

- Accelerates modernization initiatives, including the move to cloud environments
- Contains program costs by automating rollouts and configuration management
- Eliminates siloes and helps teams accelerate application deployments without managing tooling

Puppet Enterprise for Government

As the leader of infrastructure automation for government agencies, the Puppet Enterprise platform delivers the most comprehensive feature set to fast-start and scale transformation initiatives. Key features include:

- Continuously monitor and enforce desired state every 30 minutes
- Intelligent delegation and conflict guardrails
- Robust compliance auditing and reporting
- Operates in highly secure, air-gapped environments
- Role-based access control
- Over 6,600 reusable, community driven modules
- Proven in mission-critical government systems

Puppet Enterprise helps agencies automate compliance and security, fast-track modernization, and accelerate digital transformation. The platform streamlines and automates technology processes, while minimizing risk and containing costs. This enables staff to focus on high value tasks that are critical to mission objectives and success.Ready to join the thousands of organizations powered by Puppet?
